# Government Friendly

From national elections to pharmaceutical supply chain management, GoChain is also the most reliable, best performing blockchain to power government networks.
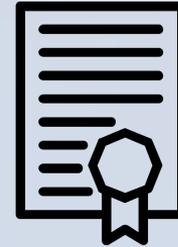

Decentralized E-Voting

Blockchain can combat voter fraud, and provide free & transparent elections, compatible with our biometric partners for unmatched security.

Supply Chain & Logistics Management

An incorruptible blockchain provides layers of trust, efficiency and transparency to the global industry of logistics where paper trails and centralized networks struggle to accel.

Land Titles, Motor Vehicle Registration & Interior Management

Use the power of blockchain to register, track, update and manage various departments of interior with unprecedented efficiency and transparency.
